

A FLEET PROPOSAL  
BY EA CARTS

# Boutique attention. Fleet scale confidence.

A proposed 72-cart EA2 Golf experience for Escalante Golf's Texas property, shaped around club identity, thoughtful hospitality and a service relationship that stays personal.

**72**

Custom fleet carts

**36**

Month proposed lease cycle

**1:1**

Hands on EA coordination

Retail reference image. Proposed green/honey finish and fleet accessories are not shown.

**Sales: Paul Kimchi · 1-847-373-6124**

EA CARTS × ESCALANTE GOLF · Estimate · October 16, 2026 · Review window ends November 15, 2026

Exact club, contracting entity and delivery address to be confirmed. Co branding is a presentation concept, not an approved partnership announcement.

## COLOR EXAMPLES

# A finish to fit your club.

Pearl concept

Navy concept

Illustrative color and logo concepts, not final drawings. Final finishes and any additional customization fees require approval.

Optional removable enclosures: \$1,700 per cart, \$122,400 for 72, not included in the base estimate. Designed for the club to install and remove. EA labor for each installation or removal is extra and is not included in the service package.

**Validity and price protection.** This estimate expires November 15, 2026, 30 days after issue. Retail and fleet prices increase January 1, 2027. Quoted equipment pricing is locked for the agreed quantities and specifications if EA Carts and the customer execute a Master Purchase Agreement (MPA) incorporating this estimate on or before November 15, 2026. Changes to quantities, specifications or scope are separately quoted. Lender rates, financing charges, taxes and third party charges are not locked by this estimate. The executed MPA governs the transaction.

CHOOSE YOUR SERVICE MODEL

Personal service.  
Two practical paths.

OPTION A · SEPARATELY PRICED · LABOR ONLY

EA weekly service

**\$5,400** /month

One scheduled eight hour day per week. Revised planning budget: \$64,800/year for the 72-cart fleet (\$900/cart/year). Final Texas coverage, staffing, holidays and travel require agreement.

Preventive checks, fleet condition review, issue triage and pro shop coordination within the scheduled day. **Parts and consumables are not included.** Extra labor, emergency callouts and travel outside the agreed scope are separately approved.

Need two days per week? Illustrative budget: \$10,800/month, separately quoted. We can tailor days, hours and seasonal coverage to your club. No full time technician or guaranteed response time is included.

OPTION B · CLUB EMPLOYED TECHNICIAN

Your onsite team. Our support.

**\$50,000** parts bank

Proposed noncash parts credit included with this service path, subject to final approval. The club hires, pays and manages its technician; EA provides technical coordination, onboarding and parts planning.

Initial inventory and eligible SKUs agreed together. Proposed drawdown at EA cost + applicable fees + 10% markup; no duplicate warranty reimbursement. After the credit is used, parts are separately payable. No additional \$50,000 cash charge is added to the fleet estimate.

A member ordering experience that stays on brand.

A proposed club approved ordering link on your website lets members choose approved models, colors and course compliant options. Orders route to EA for confirmation, payment and delivery coordination, giving the pro shop a simple place to direct members.

EA and the club would agree a referral fee or revenue share in writing. Rate, tax treatment, approved products, fulfillment territory and customer data handling remain TBD. This is a proposed program, not a live ordering integration.

# The custom fleet brief.

The supplied reference lists 60 Club Car carts. This draft adapts primary cart quantities to 72 using proposed EA equivalents, subject to final build approval.

| REQUIREMENT         | EA TREATMENT                                                                                                                                | QUANTITY |
|---------------------|---------------------------------------------------------------------------------------------------------------------------------------------|----------|
| Fleet quantity      | 72 two passenger EA2 Golf carts; supplied reference listed 60.                                                                              | 72       |
| Powertrain          | Proposed EA 60V 150Ah lithium / 5kW AC equivalent; controller and automatic parking brake compatibility require signoff.                    | 72       |
| Body / trim         | Matte Aston Martin Green target; black accent stripe; gold EA/club approved marks replace Club Car/Tempo marks.                             | 72       |
| Seats               | Cheyenne Honey target; double diamond stitching and approved embroidered club logo. Sample approval required.                               | 72       |
| Wheels / tires      | Gloss black Athena style 12-inch turf equivalent; reference 205/40-R12. Final turf/tire fitment approval required.                          | 72 sets  |
| Canopy / windshield | Black two person canopy with handles; tinted hinged windshield equivalent; numbering at canopy passenger side.                              | 72       |
| Bag protection      | Black magnetic bag cover and approved rear golf bag support.                                                                                | 72       |
| Dash / storage      | Upper phone/storage area; lower left/right wireless charging; side storage; ball/tee holders; cup inserts.                                  | 72       |
| Golf accessories    | Passenger ball/club cleaner; driver side CaddyMaster style cooler; premium steering wheel / scorecard holder; glued windshield info holder. | 72 each  |

# Engineering & acceptance.

| REQUIREMENT              | EA TREATMENT                                                                                                                                           | QUANTITY          |
|--------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| Sand bottles             | Two strut mounted bottles per cart.                                                                                                                    | 144               |
| Speed / drive behavior   | Target 13.2 mph, normal acceleration and pedal up braking, subject to validation.                                                                      | 72                |
| Charging                 | Reference shelf charger: 650W, 9-foot DC / 6-foot US NEMA AC. EA onboard architecture is an alternative, not an exact match; electrical plan required. | 72                |
| Electrical / controls    | 300W DC/DC reference; key control vs EA pushbutton, no light harness vs standard EA lighting, DBR and AutoBrake compatibility to resolve.              | 72                |
| Protection / maintenance | Differential guard and EA compatible auto park brake service tool. Clarify reference “Permanent, Standard/Heavy Duty.”                                 | 72 guards; 1 tool |
| Towing · new engineering | Reference: six 18-inch heavy duty bars + two 24-inch lead bars. Fleet towing quantities, design, load rating and validation not yet approved.          | \$4,000 allowance |
| Technology               | Screen/speakers and EA Connect installation. Final screen, speaker and harness configuration acceptance required.                                      | 72                |
| Supplier only references | Club Car paint codes, MFG hold, seat placeholders and delete lug nut entries are not EA deliverables.                                                  | Not applicable    |

Jeremy’s feasibility guidance informs this draft. Tow equipment is new development and requires design/load validation. Final samples, charging architecture, controls and the signed bill of materials govern what is supplied.

Next review: confirm the Texas club/address; approve the finish and accessory matrix; obtain a current lender proposal; select the service model and Connect tier; then issue final commercial documents.

Examples only, not final drawings. Pricing covers the proposed design and listed finishes. New components or broader changes, including a fully custom dash, may cost extra and will be quoted first.
